

COMBI-CAMP

019750

Whether it's on asphalt, gravel, sand or grass, the Combi-Camp stands firmly and is storm-proof. Without pegs or guy ropes, it can be set up in just 30 seconds and still means a solid floor under your feet.

OFF ON AN ADVENTURE:

Wouldn't it be great to put up your tent in less than a minute and even better to float 30 cm off the ground? Combi-Camp can do it. And has been doing it for over 45 years.

On vacation you need the freedom to be spontaneous, free and do your own thing. And the travel should be fun too, or it's not really vacation.

A Combi-Camp isn't fazed by a bumpy road; it's made for quick overnights on any kind of terrain.

It lets you be one with nature, with a few extra perks.

AT THE TABLE:

Head off to the market for fresh fish or local vegetables. With Combi-Camp's dream kitchen it's a delight to prepare a delicious meal. A refrigerator, shelf space and a comfortable work height are the facilities you need to conjure up a feast.

Had enough of over-full restaurants where you over-pay for soup-kitchen-quality food? Skip them and get a home-made salad from your own fridge. And for the kids, bring out something they really like, rather than buy yet another plate of chips.

The Combi-Camp kitchen is open 24/7.

If you begin your day well rested, you enjoy it more. When you camp you often get out of bed feeling awful. That's not the case with a Combi-Camp, which has a well ventilating slatted bed supporting a comfortable, one-piece mattress. There is space to bring along a cosy duvet and pillows; it's almost like being at home, and it's certainly hundreds of times better than most hotels.

The comfortable atmosphere is created by the Combi-Camp's 100% cotton tents. Cotton breathes and insulates against heat, cold and moisture. The sleeping area is double skinned so that a layer of still air keeps out the heat or cold. Ventilation windows on the sides ensure good circulation of fresh air and keep insects out.

OFF TO BED:

EXTRA SPACE:
